Re Native American Conference in DC
next week - March 1-3

From Thomas Polgers, 26 Feb 10

Gov Herbert
& Lt Gov Bell

Re Native American
Issues
(see NCAI.org)

Next week is a conference
of the National Congress of
American Indians in DC

I have labored now for nearly
two years to get them to
understand the poisoning risks
they have been suffering
because of the egregious heating
& ventilation design established
by HUD over all-manufactured
& mobile homes since 1976

I also have spoken to
Larry Echohawk about the
problem.

Yet in this period of over
a year that everyone has been
notified and apprised - nothing
has been done to notify or rectify

Please use your influence
to press this issue for them
and for our own victims.

Received Copies for
Gov & Lt Gov
26 Feb 10
B.S.

Please let me know your
opinion on the suggested
Executive order we gave
your staff - to at least
protect Utah State residents
(living in Manufactured and
mobile homes, so designated)

This Conference of Native
Americans is a perfect
opportunity to get this problem
exposed to all the Native
American Communities. Then
we might be able to get
enough pressure on
Congress and HUD to fix
the problem for the other
victims (~32 million others
who are Americans or residing
here in the 16 million dangerous
housing units)
